AB - J10236941 Agent for dermal application contains an extract of meat of pearl oyster.

- The amount of the extract of meat of pearl oyster added to the agent is preferably 0.01-5.0 wt %. Meat of pearl oyster is extracted with a solvent such as water, methanol, ethanol, propanol, isopropanol, 1,3-butylene glycol, propylene glycol, glycerine, butyl acetate or acetone. The pearl oyster is e.g. Pterioida pinctada or Unionoida Hyriopsis.

- USE - The agent is used as cosmetics such as lotion, milk lotion, cream and as drugs such as ointment.

- ADVANTAGE - The agent inactivates hydroxy radical and super oxides which cause dermal inflammation and wrinkles.
